

Mailing Series Streamfeeder V-2000m Wide Product Continuous Feeder

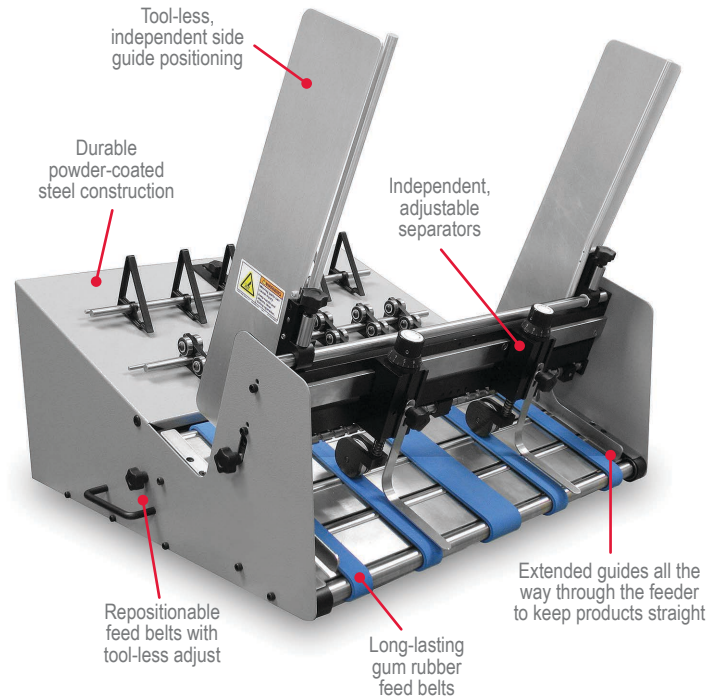

Overview

The most reliable and safest 20" wide continuous IJ feeder in the market today! With CE certifications you can be assured that you have the safest machine both mechanically and electrically and we back it with a two-year limited warranty. The V-2000 is capable of feeding flat and multi-thickness products up to 20" wide into mail production streams consistently at high speeds with exceptional alignment qualities. The importance of straight feeding and minimizing skewing can help improve USPS® MERLIN™ verification results, leading to significant savings for a mailing service company.

Feed a wide variety of flat and multi-thickness products into production mail streams including ink jet addressing systems, tabbers, labelers, and more.

Standard Features

Repositionable feed belts • Independent side guide positioning • Extended guide rails all the way through the feeder • Two independent adjustable product separators • Long lasting natural gum rubber feed belts • Variable speed control • Universal external run interface kit
