System Length: 37"
System Width: 33"
System Height: 71"
Tabletop Height: 32¾" to 35" - Standard
                            35¾" to 38" - Optional
Weight: Approximately 450 lbs.

Electrical Requirements
115 VAC 50/60 Hz @ 10 Amps or
230 VAC 50/60 Hz @ 5 Amps

The CME - Ameritek Tabber applies tabs, labels, stamps, repositionable post-it notes, and scratch-offs to a wide variety of media including tri-fold brochures, newsletters, small catalogs and many others. It is designed for professional mailers, commercial printers, fulfillment houses or anyone else requiring a heavy-duty high quality Tabber/Labeler/Stamp Affixer.
It has front panel controls that are easy to use, making it simple to set up jobs or to switch between applications.

The CME- Ameritek Tabber can be used in-line with most friction feeders, inkjet print systems, conveyors and even some folders. It can also be run offline with a feeder in stand-alone operation.

The CME- Ameritek Tabber can also be configured as a Dual Headed Tabber. This system can tab on the leading (toe) and trailing (heel) edges of a booklet in a single pass. The Dual Headed Tabber can run in-line or off-line as a system, or the Tabbers can be unlocked and used as stand-alone units.
