

ROM Fusion

Features and Benefits

- Wear-free DC brushless direct drive technology with simplified mechanics enhances system reliability
- Automatic strap loop ejection if cycled without a package to prevent machine jamming
- Easy strap coil change and threading system
- Wear-free, precision strap track system
- External easily adjustable strap tension via potentiometer from 0-50 lbs. including special "soft" tension mode for delicate bundles
- Hinged/removable front stainless steel table top improves interior access
- Sturdy foot pedal for cycle start or optional photo-eye
- Small machine footprint; fits into tight spaces
- Available in three track sizes

The ROM Fusion is Mosca's entry-level walk-up bundler with high performance features including thermostatically controlled heat sealing system and energy-saving DC brushless direct drives with an impressive 50 strap per minute cycle speed.

The Fusion offers many of the same components found in Mosca's high-end machines and has been proven in many adverse environments and demanding applications.

ROM Fusion

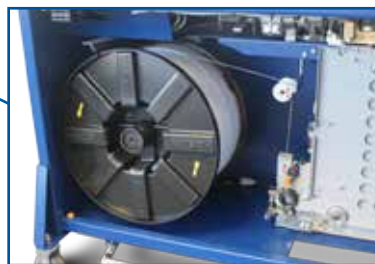

- 180° rotatable control panel offers operation from front, back, or side
- Precise electronic tension control
- "Soft tension" mode for fragile products

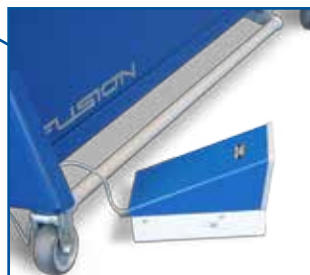

Optional photo-eye for auto cycle on package entry.

- Easy-open tabletop for quick sealer access
- Mosca Standard 3 heat sealer

- Compact cabinet for operational versatility
- Ergonomic dispenser for easy coil loading

- Front and rear footbar for convenient activation
- Optional remote foot switch allows easy handling of larger packages
